Technologies : ASP.Net MVC, C#.Net, SQL Server 2014.
Web Technologies : Bootstrap, HTML, JavaScript, jQuery.
Domain : Health Care domain
Role : Dot Net Developer.
Team Size : 5
Duration : Jun2022 to May 2023.

Description:

The motto of building this application is to accommodate all the existing applications running on different platforms into one application & if any new client is added, it can be accommodated. The main advantage of this application is Customizable Input, Output and Reports. This application is used for medical coding. Cross mapping of ICD-9 with ICD-10 or vice-versa is allowed based on DOS with the implementation of ICD-10 coding in US Health Care industry. Auto-coding process is enabled by capturing all required codes (CPT, PQRS, ICD-9, ICD-10, modifiers etc.) in the medical record with appropriate analysis to improve the quality of codes captured.

Responsibilities:

- Involved in Designing Pages using HTML and Bootstrap, ASP. Net MVC and coding business layer using **C#. NET**.
- Using Bootstrap, jQuery, JavaScript, and Html for front-end development.
- Designing, Developing, Maintaining, and reviewing Requirement Document.
- Involved in writing Stored Procedures, Joins and functions in SQL Server.
- Using Postman for testing Api calls
- Using Source Tree for code check in.

Project-2: City Bank

Tools Used : Visual Studio 2019, Jira, Bitbucket, Visual Code
Technologies : ASP. Net MVC, C#.NET, SQL Server
Web Technologies : jQuery, Html, JavaScript, CSS, Bootstrap
Domain : Bank domain
Role : Dot Net Developer
